Keiser University's Fort Myers Campus Unveils Diagnostic Medical Sonography Program

Ft. Myers, FL – Oct. 12, 2011 – Keiser University’s Ft. Myers campus celebrated Ultrasound Month by hosting an Open House to introduce their new Diagnostic Medical Sonography Program. Community partners and clinical affiliates were invited to attend and learn about the new program.

Keiser University’s Associate of Science degree in Diagnostic Medical Sonography presents an integration of didactic, laboratory and clinical experiences. The program prepares students to function as entry-level diagnostic medical sonographers.

“We are delighted to be able to offer this program in the Ft. Myers community because it will allow us to meet a need of employers in this area,” stated Nancy Tedros, Campus President. After successful completion of this program, graduates will be able to be able to obtain their license so they are then able to work in their field.

Some of the community partners and clinical affiliates in attendance at the Open House were Lee Memorial Health Systems, Radiology Regional, and Vein Specialists and Vascular Diagnostics. Tours of the classrooms and the diagnostic lab were provided to those who came to the event.

About Keiser University:
Keiser University is a private, not-for-profit, Level V SACS accredited university serving approximately 18,000 students seeking doctoral, master’s, bachelor’s and associate degrees in over 60 programs. The University holds top national and state rankings in production of associate degree graduates in health professions and related sciences, including nursing, and over 60 percent of students annually graduate within S.T.E.M. (Science, Technology, Engineering and Mathematics) fields. Keiser University is comprised of 14 campuses throughout Florida, a Graduate School and a nationally recognized College of Golf. The University’s educational reach extends globally through its international programs including the Latin Division, a cooperative agreement in the Eastern European nation of Moldova, and a branch campus in Shanghai, China.
