July 12-15 @11am – 1pm Math Bootcamp

My name is Edward Good, and I'm super excited to be your instructor for the Summer 2021 Math Boot Camp! The Math Boot Camp is a short and intensive web-based math workshop to help students improve their math skills and place into a more advanced mathematics class (MAT1033 or higher). The boot camp provides group instruction together with MyMathLab remediation modules to assist students. I can't wait to meet everyone and begin the workshops to improve your math skills!

July 19-21 @11am – 1pm English Bootcamp

The English Bootcamp is designed to review elements of writing that new students will be introduced to in English Comprehension I or Basic English. The topics for the week will focus on common grammatical mistakes, developing a thesis, introducing APA 7th Edition, and discussing academic integrity. A different professor from the English Department will be leading each daily session. During the week, the participants will have the opportunity to ask questions about the various topics.
