April 24, 2018

To Whom It May Concern:

The Broward County Medical Association has been involved with Keiser University in many areas of the University's Healthcare initiatives for 20 years. Keiser University has provided quality students to work in many levels of healthcare in the Broward community.

We have particularly worked with the Physician Assistants (PAs) Program. We know that PAs graduating from the Keiser University program are of excellent quality and have been hired throughout the Broward community by local physicians.

I have personally served on an Advisory Board who awarded scholarships to deserving students. This was a Keiser University program that showed the community that Keiser truly cared about its students. It was very personally rewarding to me, and I was pleased to be asked to volunteer to serve.

Keiser University and its leadership are highly respected in Broward County. They have been willing to share and donate the university space many times over the years to the physician community.

Very sincerely,

Cynthia S. Peterson  
Chief Executive Officer
