To Whom It May Concern:

I am writing to let you know why Keiser University is important to Greystone Healthcare Network. For more than 15 years, Greystone Healthcare has owned and managed skilled nursing facilities across Florida. Today we currently have 27 facilities along with six home health agencies, and we continually strive to provide a higher standard of member care backed by a team of driven and compassionate healthcare professionals.

We have two communities in the Melbourne area, Viera Health and Rehabilitation Center and Rockledge Health and Rehabilitation Center, and they, like all Greystone Healthcare communities, remain dedicated to meeting the individual needs of our members in a sincere effort to improve the lives of others. Keiser University graduates have long been welcomed and hired into our facilities, as they have seamlessly integrated into our existing teams based on their thorough training and preparation for their nursing roles. This is due to the excellent training received in Keiser's Nursing programs.

We always look forward to attending Keiser's job fairs and meeting their graduates, as we take pride in hiring the right person the first time, encouraging and strengthening their talents to ensure future successes.

Greystone Healthcare Management is driven to be an industry leader, and we hold ourselves to a higher standard of achievement. It is apparent that Keiser University and their nursing program graduates aspire for this as well.

Sincerely,

A handwritten signature in black ink, appearing to read "M Marconi", followed by a long horizontal line extending to the right.

Matthew Marconi  
Director of Labor
