To Whom It May Concern, Keiser University is important to our community for many reasons. I am currently the Staff Development Coordinator at Life Care Center of Melbourne a 120+ bed skilled nursing facility located next Holmes Regional Hospital. We currently support Keiser and other local nursing schools by providing clinical sites for the RN program. We just recently finished with a future class of graduating RN's this month. It has been a pleasure to have this opportunity to work with this most recent group of students, they were all very eager to learn, professional and extremely helpful. The professor was among one of the best I have had the pleasure working with as well!! We are fortunate to have the advantage to assist in the education of our future nurses and to take a part in their professional training. I personally feel that the education received from Keiser is top notch. We currently have 200+ facilities state wide. I hope to continue the current relationship that we have at our facility.

Sincerely,

Amber Silverthorn RN, SDC
