To Whom It May Concern,

I am writing this letter to share the relationship between Keiser University in Pembroke Pines, FL and Any Lab Test Now in Miramar, FL.

Our healthcare facility has provided clinical services to the Miramar-Pembroke Pines communities since 2011. Some of the services that we provide include physicals, tuberculosis screens, lab work and drug screens. We provide care primarily to people who do not have insurance or have insurance with high deductibles. Many of our local students fall into these two categories.

Our relationship with Keiser University first began when we offered affordable and professional clinical services to their students. Over the years, it has progressed to offering them the opportunity for our location to serve as an externship site. Recently, we have been in discussion about partnering to raise money for non-profit organizations that we mutually support. As you can see, the relationship has grown over the years and the respect that we have for each other is mutual.

Keiser University supports many communities around the state. In this area, they provide people of all ages an opportunity to pursue their educational and career goals. They also give an opportunity for small minority-owned businesses like ours, to provide services that are needed and appreciated. Please feel free to reach out to us if you have any questions. Thank you.
