Director of Student Services
5600 Lake Underhill Drive
Orlando FL 32807

Dear Dennis,

TeleSolutions, based in Orlando FL, has been operating over 20 years in the local area. As a marketing consulting company, most of our clients are located outside the State. However, our core base of employees reside in Orlando and we are proud to have partnered with Keiser University for the past five years.

Keiser University provides community residents with a pathway to higher earnings through a diverse offering of degrees and fields of study. This leads to an improved quality of life and a positive impact on society overall. While, the economic impact of Keiser University on Orlando is important, the social impact is even more critical. Students have easy access to improving their life skills and contributing to the community. Through the university setting, students improve their critical thinking skills, which enhances other parts of their lives.

Keiser University provides local employers the opportunity to showcase their products and services to the student body and to recruit graduates into the world of business. Through internships and mentoring programs Keiser students add tremendous value to our local community.

In addition, Keiser University gives back to the community by encouraging their Senior Staff to participate in business organizations throughout the community. An example of this involvement is serving on the board of the East Orlando Chamber. The presence of Keiser within the area lends credibility to their vital role in our community and exemplifies their dedication to providing a platform for both higher education and for improving the quality of life for graduates.

Please feel free to contact me if any further information is needed!

Best Regards.

Susan Wilcox
