

To Whom It May Concern,

Keiser University has been important to both myself and this community since the first day I arrived on campus. Their support for our local Veteran community is by far better than any other school I have been to. Personally I run a non-profit training and placing service animals to Veteran's suffering from PTSD and TBI injuries. Keiser has given me a platform to spread our cause and has helped placed 3 dogs in the past 8 months. A couple months ago I received an email stating that some of Keiser's students wanted to contribute by doing a fundraiser for Koda's Choice. Of course I said yes, but little did I know what was about to happen. Not only did they raise some money, but we also gained some valuable volunteers from this fundraiser. Koda's Choice and myself will forever be grateful to Keiser University and the support they have shown us. We look forward to continuing our partnership any way we can in the future.

Respectfully,

Lawne Snyder
