To Whom It May Concern

Keiser University is important in our community because they are known to share the knowledge of a higher education to young adults who are seeking degrees by educating that they to can complete a degree whether they are a full-time employee or a full-time parent by giving optional and flexible learning schedules that fit your lifestyle. Kesier has been known to show support to the community, staff, and students throughout South Florida. I am a Kesier graduate Class of 2006 Occupational Therapy Assistant Program. Kesier has set the high standards compared to other universities that I have known or attended for a higher education. The professionalism that they teach and expect from their students meets and or supersedes professionals that are in their careers. I have been a clinical instructor for Keiser University for 4 years and have had many interns under our program in which at least 80% were hired at the facilities where they shared their externship. The students leave Keiser University prepared, professional, proficient, and have great time management skills in the knowledge needed to carry through in their externships that will carry over to their professional careers. I am proud to be an Keiser University Alumni giving back to the university as a clinical instructor to prepare the students with professional and rewarding careers.

Sincerely,

Candice Young MHA/GER, COTA/L, CLT
