Page 136-137 , Programs Offered at Each Campus

Add the following program at Sarasota:

BA Public Administration (Specializations in Politics, Communication Studies, and Emergency Management)

Pages 237-240, Program Descriptions, Law Enforcement Operations

Update the Program Outline as described below:

Replace CJF3140C Criminalistics I with CJF3142C Forensic Science Application I

Replace CJF3141C Criminalistics II with CJF3143C Forensic Science Application II in each concentration

Replace BSC3401C Forensic Biology with CJF3460C Introduction to Forensic Biology

Replace CJE4950 Forensic Investigations Capstone Course I with CJE4960 LEO Capstone I

Replace CJE4951 Forensic Investigations Capstone Course II with CJE4961 LEO Capstone II

Pages 342-518, Course Descriptions

Add the following course descriptions to this section:

CJF 3142C (4.0 credit hours)

Forensic Science Application I

This course addresses the information that can be obtained through scientific analysis of hair, fibers, paint, glass, soil, firearms, bullets, tool marks and combustibles/explosives. Preferred prerequisite: CJE2670C

CJF 3143C (4 credit hours)

Forensic Science Application II

A study of the results that can be obtained from the scientific analysis of organic and inorganic material in the form of blood, DNA, chemical and metal metals. Prerequisite: CJF3142C Forensic Science Applications I

CJF3460C (4 credit hours)

Introduction to Forensic Biology

Presents the forensic value of handling, documenting, preserving, testing and analyzing biological evidence associated with deceased human beings. Topics include scientific methods for identifying the presence of blood,

toxic substances and other bodily fluids at the scene or in the forensic laboratory. Includes methods used to establish time and manner of death. The course also addresses safety issues involved in handling biological evidence and legal and ethical issues associated with forensic science. Prerequisite: BSC1005 General Biology, and BSC2085C Human Anatomy & Physiology I (BSC1006 Advanced Biology may be substituted)

CJE 4960 (2.5 credit hours)

LEO Capstone I

Course requires student to utilize knowledge learned throughout the program and apply these theories to real world issues. This capstone project gives students an opportunity to demonstrate their ability to relate what has been learned throughout their program. Students are expected to synthesize and integrate learning experiences acquired throughout their program and to evaluate research and current topics relative to their area of concentration. Prerequisites: Should be taken in the students last semester before graduating

CJE 4961 (2.5 credit hours)

LEO Capstone II

Course requires student to demonstrate knowledge learned throughout the program and apply these theories to real world issues. This capstone project gives students an opportunity to demonstrate their ability to apply what has been learned throughout their program. Students are expected to synthesize and integrate learning experiences acquired throughout their program and to evaluate research and current topics relative to their area of concentration. Prerequisites: Should be taken in the students last semester before graduating
