To Whom It May Concern:

Keiser University is important to our community for so many reasons. We are an externship site for the university and have hired several of the university's graduates. Keiser students are well-prepared when they come to us for their externship and when they graduate as a Medical Assistant they are so well trained we hire them! Our facility has multiple practices so the students are exposed to multiple specialties to learn from and begin their new career well rounded and well prepared. Such an asset they are to our community.

Sincerely

Theresa Phillips
