

CAPITAL REGIONAL
MEDICAL CENTER

May 9, 2018

To Whom it May Concern:

Keiser University is important to our community/agency for being dedicated to the exemplary outcomes of all the programs in which they offer. Here at Capital Regional Medical Center (CRMC) we have employed numerous Keiser graduates.

Here at CRMC, we serve as a clinical rotation site for the nursing program and an externship site for both the Radiology and Medical Assistant programs. We are able to provide education in an acute care Hospital setting. With these sites in place, we are able to help students prepare for employment gives us the advantage of experiencing their work habits and professionalism prior to offering them employment. Keiser University students present with the highest level of organization skills, time management skills, and professionalism.

As a two time graduate of Keiser myself, I encourage my colleagues to expand their resources with students from one of the schools with the highest pass rates, Keiser University. I am such a strong believer in the programs that I serve on the Advisory Board.

We value our strong relationship with Keiser and hope that our relationship will continue well into the future.

Warm Regards,

Tracy Tully, RMA
