To Whom It May Concern,

Clinical Site Partners, LLC (CSP) was established based on the needs and demands of clinical research site professionals across the country. We have a network of research sites who share centralized processes, training, contracts, and budgets. Our sites specialize in Respiratory Research, Sleep Medicine, Gastroenterology, Pediatrics, Internal Medicine, Endocrinology, Rheumatology, Allergy, and CNS. We have also developed preferred partnerships with Sponsors and CRO's.

Keiser University is important to our community and our organization for several reasons. Keiser University is important to our community because Keiser is well known throughout the state of Florida. This means that many of our future leaders will most likely graduate from Keiser University.

Keiser University has impacted our organization in many ways. We hire Keiser University graduates from the medical field for our positions of Sleep Technicians, Research Assistants, Recruitment Coordinators and Clinical Research Coordinators. Keiser University graduates become quality employees, are professional, have great time management skills and care about the work we do here for the community. In addition, one of our leaders, here at CSP, David Marquez, has served on Keiser University's advisory board.

We cherish our relationship with Keiser University. We look forward to strengthening our connection in the future as we continue to hire quality employees to service our community.

Sincerely,

Holly Morgan, SHRM-CP
Human Resources Manager
