To Whom It May Concern:

Keiser University is very important to our community for they are well known in providing a wide variety of programs. I for one, am a Keiser alumni graduating with an AS in Physical Therapist Assistant from the Ft. Lauderdale Campus in 2011. Even though it's been well over 10 years since I've graduated, Keiser University remains a large part in my life for I'm an original member of the advisory board for the PTA program for Keiser Miami Campus.

I'm an active certified clinical instructor, of which have been very active with the Keiser University PTA students during their clinical affiliations. I truly admit that Keiser University is and continues to invest exceptional quality in professionalism with their students. I personally have recommended several students for employment within the company in which I'm employed, with very good outcomes.

If you have any additional questions or need additional information, please feel free to contact me without hesitations.

Thank you,

Ana Cuervo

Physical Therapy Assistant
