To Whom It May Concern,

My name is Alexander Hernandez and I graduated from Keiser University. I graduated from the Occupational Therapy Assistant program and I am a member of the Keiser University Advisory Board. I am a member of the advisory board because of the professional development and networking provided, in order to keep me growing as a professional and a leader. Keiser University is important to our organization and community in order to share the love and passion for occupational therapy especially in the pediatric setting. My family and I opened a special needs clinic 6 years ago called Dream Hope and Believe Therapy Corp. where we provide therapy services such as occupational, physical and speech therapy for the pediatric population ages 0-21. My little sister who was born with Down Syndrome was my drive and focus on providing exceptional service to the special needs community. Keiser University has truly impacted my life with teaching me the skills needed to effectively provide therapy services. I am also a clinical instructor for the occupational therapy assistant program to help influence and guide students while sharing my knowledge and love for this career. By joining the advisory board I am able to give insight about the pediatric community and how Keiser can best assist with the preparation the students need to transition into the field with high professionalism and knowledge needed to succeed. Keiser University has provided me with exceptional students who demonstrate great enthusiasm, eagerness to learn and develop professional skills in the field. I personally hire Keiser graduates, because quite frankly they are some of the best and well-prepared people.

Best regards,

Alexander Hernandez COTA/L
