

To Whom It May Concern,

I am a member of the Keiser University Advisory Board as a former educator and an attorney residing in north Florida. I feel Keiser University does an excellent job in instilling student soft skills and academic excellence. Keiser University is important to our organization and community for educating and grooming disciplined criminal justice professionals.

As you may be aware, there is a shortage of college educated criminal justice professionals, Keiser University helps the industry fill this void. Although I am new to the Keiser University Advisory Board, its reputation is known for being a pipeline of community criminal justice practitioners. If given the opportunity I would consider hiring Keiser students and I would whole heartedly recommend Keiser graduates.

Thank you,

Kendra A. Hollern, Esq.
