

To Whom It May Concern,

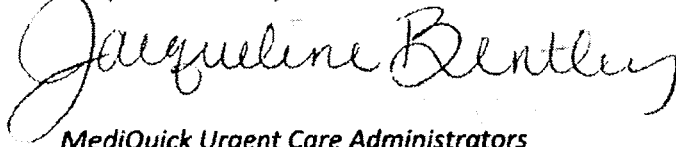

Keiser University has played a vital part to our community and the surrounding communities for years. MediQuick Urgent Care Centers is honored to be partnered with Keiser University where we serve on their advisory board. Over the past decade our organization has hired many Keiser graduates and have had the privilege to be an extern site for both Medical Assistant and Radiological Technology students at our two clinics in Flagler County. Keiser ensures their students receive hands-on learning and gain valuable experience to utilize in their new profession. In our experience, Keiser University students and alumni are much more advanced when it comes to their clinical, professional, and organizational skills compared to other programs. It shows that it is a top priority of Keiser to make sure their students are well prepared and have the confidence needed to excel in their new career. MediQuick Urgent Care is proud and grateful to be partnered with a University that always puts their students first and cares so much about their future success! We look forward to continuing hiring Keiser University graduates in the future!

Sincerely,

Annarita Elliff
