

Your Connection to a Healthier Life

To Whom It May Concern:

Millennium Physician Group is a leader health provider in south west Florida with several offices throughout the state of Florida, I have been with the organization since 2016 and before that I was in the state of Indiana were I was part of Ivy Tech community college as an adjunct for the PTA program and clinical instructor for ten years

I am a member of the Keiser University Advisory Board because it is important to be part of an educational institution that gives and serves the community with excellence and commitment. I have been part of the Advisory Board since the Fort Myers campus started. Keiser University is important to our organization because gives us the opportunity to share our knowledge with the students that come for their clinical rotations and groom them to be the best in their field

I had the opportunity to be clinical instructor to a Keiser University student for their first clinical rotation and I was very impressed with their level of education, professionalism , time management, respect and commitment. Really shows all the time and preparation the faculty at Keiser University puts into making sure that all students face their clinical rotation with no difficulty and prepare them for their future careers .

The faculty members at Keiser University keep constant communication with the clinical sites to keep track of the students, progress, or difficulties that they may have. I would no doubt to hire a PTA graduate from Keiser University to work in my clinic
