To Whom it May Concern:

Finding employees that are professional, educated and stay in a position is a challenge that many organizations face in today's workplace. We, Positive Behavior Services, have the privilege of having a long-term relationship with Keiser University and we have got the best interns that later had become our employees. Positive Behavior Services is an ABA provider in Dade, Broward, Palm Beach, Fort Myers and Georgia. The owners, who are Board Certified Behavior Analysts, started the company in 2012 and have grown and expanded ever since. In 2015, we had the opportunity to become part of the Psychology Board Committee at Keiser in the Miami campus and became an internship site. The first intern that we had back in 2015 still our employee almost 6 years later. Many of the interns that had come from Keiser University were hired after the internship, because they showed interest in the work, the field and because they proved to be professional and well educated.

The opportunity to be part of the Psychology Board Committee has given me the opportunity to experience the dedication of the Faculty and staff at Keiser and the value that is put on listening to the needs of the community. During the Board meetings the director of the Board would present the proposals that they had related to the material, the content of the subjects and the textbooks, etc., that the students will be exposed to. Our input and experiences were valued and taken into consideration to make changes or approved what was presented. In the same manner, Board members and community partners were asked and heard about needs in the community that the University could fill in. I am very pleased with the opportunity to be part of the Keiser community locally, as I see that they are committed in building well educated professionals for the future.

Sincerely,

Maria Silva
Vice-President
