

RE: Keiser University Letter of Support

To Whom It May Concern,

I am writing this letter to demonstrate how important Keiser University is in supporting our community by providing a practical, hands-on approach to career focused education. Positive Behavior Supports Corp (PBS) has partnered with Keiser University for over 7 years across our 11 regions in the state of Florida to serve as a practicum site for students seeking a degree in behavior analysis or psychology. It is a required part of their study to receive a certain amount of hands-on, real world training in order to earn their respective degrees and be allowed to sit for their applicable boards. We are always eager to work with Keiser students as they maintain a degree of professionalism and accountability that exceeds our expectation. Keiser University students support our agency in providing the needed behavior analysis services (ABA therapy) to so many families and their children with special needs. This collaborative partnership allows students to see what our agency can offer them post-graduation and allows for us to provide them with a fulfilling career once they earn their degree. Our families and staff are so grateful to have the opportunity to work with Keiser students and staff for all these years.

PBS will always welcome the opportunity to work with Keiser University students, graduates and staff.

Best regards,

A handwritten signature in cursive script that reads "Tahra Cessna".
