& Sports Medicine**

To whom it may concern,

Keiser University is important to our community because they prepare students for the work field exceptionally well. We have hired many graduates from there and have never been disappointed with a student. Keiser is our first choice when selecting a new employee because their students' knowledge and work ethic always meets our level of expectation. We are also an externship site and we are very impressed with the amounts of eagerness and knowledge the students have. I personally have been a CI for Keiser for 5 years and they never disappoint.

Our company has been open for five years and we have multiple employees from Keiser and we could not be more satisfied. We have another location in Cooper City, FL and we also have Keiser students employed there. We would definitely hire from Keiser in the future. Their professionalism, organization skills, time management, and productivity is phenomenal.

Thank you,

David B., PTA
