

February 13, 2021

To Keiser Flagship Campus:

I am one of the owners of Sprout Behavioral Services, Inc., an applied behavior analysis provider in the community. Our company has been servicing Palm Beach County since 2016 by providing crucial support and training to those with Autism. I am writing this letter to share my experience collaborating and working alongside Keiser University, as an intern site for Keiser students.

Although we have recently began our internship program as of January, 2021, it has already been a rewarding experience. I have had the pleasure of communicating with Robin Schupper, Psy.D., the Psychology Program Director of the Keiser Flagship Campus, regarding internship details; and community outreach events over the past year. Robin recently assisted in connecting us with a psychology student intern.

The Keiser internship program has given us a chance to disseminate behavior analysis to students who may otherwise be unfamiliar with this area of psychology. This also allows our current staff to take on an active training and mentorship role. The intern that Robin has connected us with has been an exemplar in professionalism and attentiveness.

As a small business and active employer in the Palm Beach area, we feel our current relationship with Keiser has not only been beneficial but is an important building block in growing our company. We look forward to providing career opportunities to those who complete our internship program through Keiser.

Respectfully,
