Adanna Amanze, MD, FACOG

To Whom It May Concern:

Keiser University is very important to our community, because the curriculums are designed to provide training to individuals seeking careers that employers are looking for. We are an externship site for Keiser's Medical Assistant program. We have been in Tallahassee since 2017 and we have had three students do their externships with us and we hired two of them. The professionalism, work ethic, computer knowledge, the care for patients, and various clinical/medical techniques they possess has made it easy for us to train them. We are happy to have them train with us and they are grateful for the opportunity. We always welcome those who choose to start their career with us. We are honored to be a clinical site that helps students gain the experience needed to launch their careers. As we continue to grow, we will continue to turn to Keiser University for our clinical staffing needs.

Yours truly,

Jonathan Brantley
