Keiser University

To Whom it May Concern;

I am a member of the Keiser University Advisory Board for the past s five years because I find that it is critical to collaborate with the educational facilities of our future nurses. The partnership opportunity allows me to influence curriculum and clinicals based on the changing healthcare environment by sharing the changes and experiences periodically. I have been a key note speaker at their graduation and it is always a pleasure to partner with this organization.

Keiser University offers a number of healthcare programs, helping AdventHealth meet the needs of the communities served. Keiser provides quality education, and the students are well prepared for the professional roles as they enter. Keiser supports active role of their previous students as a part of their advisory boards, which is a great idea to keep the feedback grounded in the reality of a previous student that has successfully completed the program and entered the work environment. I find that the faculty and administration are approachable and interested in hearing new educational needs, i.e. the BSN programs to align with Magnet designation. They are future oriented which will provide us with current education to support evidenced-based relevant practice.

It is a privilege to work with this dedicated team of professionals. I look forward to future partnership.

**Sincerely,**

**Deborah B. Laughon, MSN-ED DBA CCRN CENP**  
**Director of Professional Development and Clinical Excellence**
