

To whom it may concern,

I am a member of the Keiser University Advisory Board because I want to influence students and help set them up for success. I also want to connect with like-minded individuals and create ideas that will benefit our community. Finally, I want to mentor students and provide them with support to aid them in their future careers.

Keiser University is important to our organization and community because it provides students with flexible programs to allow everyone the opportunity to receive an education. Keiser has a prestigious faculty to provide students with the best learning experience possible. This university prepares students to enter the labor force by providing them with professional skills that will benefit both our organization and the community.

AdventHealth Winter Park Hospital, formerly known as Winter Park Memorial Hospital, has been serving this community since 1955. AdventHealth has been serving its mission of Extending the Healing Ministry of Christ for over 100 years. It has now expanded to more than 130 facilities across the country. Keiser University provides us with skilled workers that help our organization grow and continue to provide our patients with whole person care.

Keiser University is valuable to this community and our organization because it sets students up for success and prepares them to be productive career-minded individuals that will contribute to our society. As a new member of the Advisory Board, I am excited to learn more about Keiser University and how our partnership can further benefit this community.

Sincerely,

A handwritten signature in black ink that reads "Nicole Ayoub" with a long, sweeping flourish extending to the right.

Nicole Ayoub

Chief Nursing Officer

AdventHealth | Winter Park
