To Whom it May Concern,

It is with great pleasure that I send this letter to share my relationship with Keiser University. I am a member of the Keiser University Latin American Campus Advisory Board because I have received students from this campus and I am in the position to contact alumni of this institution to help my institution to grow. The value that I feel Keiser University has provided to the community is that their alumni are people with a strong sense of commitment, they have learn the technical and ethical values to produce a special bond with the institution and the clients that we receive, and Keiser University has been a great place were we can seek to share knowledge with future professional and be taken in to consideration for different projects that reach out the community that we are living in.

Bay Network Solutions has been a company that is in contact with Nicaraguan society and has has had the opportunity of welcoming Keiser University's graduates as part of our team, where they have shown their professionalism, organizational skills, time management and productivity. We would hire other Keiser University students/graduates because of the quality of the graduates and the bonds that this institution had bring to the community in Nicaragua.

Thank you,

A handwritten signature in black ink, reading "Rebeca Robin Mendoza Morales", written over a horizontal line.

Rebeca Robin Mendoza Morales
