

Providing Speech, Occupational and Physical Therapy

---

3/14/2022

To whom it may concern,

Keiser University is important to our community for many reasons. Our relationship with Keiser University benefits our business by providing us with the ability to work with talented professionals. We serve the Pediatric community by providing Speech and Occupational Therapy to kids from age 0 to 21, and we've been doing so for over 20 years. The students from Keiser University offer professionalism, productivity, and most importantly, enthusiasm; as an employer, these are very important qualities to find. We are infinitely grateful and will continue to hire talented graduates, continuing our relationship with Keiser University.

Regards,
