Cindy Mead  
Manager-Operations  
City of Tallahassee Parks, Recreation and Neighborhood Affairs  
1201 Myers Park Drive  
Tallahassee, FL 32301

To Whom it May Concern,

I am honored to be an active member of Keiser University's Advisory board for many years on the committee for "Exercise and Sport Science". As Operations Manager for the City of Tallahassee Parks, Recreation and Neighborhood Affairs Department, it is a great advantage to partner with Keiser University and share the needs of Tallahassee's athletic community ensuring a continued stream of quality graduates.

Keiser University is always intent on meeting the needs of their employers and continually strives to assist the employer community in any way possible. During Advisory Board meetings we review curriculum, textbooks, externship opportunities, etc. Advisory Board members are welcomed to provide valuable input ensuring positive outcomes for both graduates and the organizations they go to work for.

I have hired several Keiser University Exercise and Sports Science graduates to work in key positions at the City of Tallahassee's Parks and Recreation Department and will continue to do so. Keiser University graduates are always well trained, professional, and eager to take on responsibility.

Keiser University's model of preparing qualified students for career positions certainly benefits my industry and the Tallahassee community as a whole. I look forward to a continued partnership with Keiser University for years to come!

Sincerely,

Cindy Mead  
Manager-Operations  
City of Tallahassee Parks, Recreation and Neighborhood Affairs
