

Jacqueline Dixon R.M.A.
Keiser University Advisory Board Member

As a member of the Medical Assisting Advisory Board, I have enjoyed attending the meetings and learning more about the Medical Assisting Program. I have been able to provide feedback and recommendations to further assist the future medical assistants.

We have had the opportunity to host many students during their externships and some ended up being long term employees. Keiser University has had a direct impact on the local medical field by training these students and preparing them to be able to provide the community with quality care.

I look forward to continuing our relationship as part of Keiser University's Medical Assisting Advisory Board.
