To Whom It May Concern,

Keiser University has been important to our community for 2 years as they have provided strong education for future therapy students. As Little Champs Therapy & Yoga continues to expand within the community, it is our pleasure not only to partner with the Level 2 students but work with graduates who come from Keiser. We are happy to be able to provide students with the essential tools they need to feel readily prepared for when they enter the workforce. Keiser University has played a pivotal role in strengthening our community by allocating essential resources via education and community outreach. We at Little Champs Therapy & Yoga are grateful for the opportunity to collaborate with Keiser as being a part of the future of the pediatric therapy industry is a very high priority to us. Our goal is to continue to partner with Keiser University to grow and enhance our community and provide the upmost quality of care for students and patients in need of therapy.
