

To Whom It May Concern,

I am Dr. Virginia C. Phipps and I am a member of the Keiser University Advisory Board because, primarily, I enjoy the educational process immensely. I also have significant experience that I can share with these health care providers in-training. I also aim to be impactful in helping to shape the educational process.

Keiser University is important to our organization and community for its ability to provide a steady source of well-trained personnel, and for being on the cutting edge of science and technology.

Keiser University has been impactful on my practice by allowing me to use them as a resource for staffing needs. As an Internal Medicine provider, I need well-trained and professional staff, and I can rely on Keiser University for this. I have found their medical assistants to be a cut-above the rest, courteous and diligent.

As a new business in the community, it is an honor to be invited for my inaugural service on the Advisory Board. It is my intent to continue to consider Keiser University for my future expansion needs.

Yours sincerely,

Dr. Virginia C. Phipps
