

To whom it may concern,

My name is Dr. Bill Jensen, and I am a member of the Keiser advisory board. I joined the board so that I could have an impact on Keiser and what they brought to the table to better their students experience with the college. As a practicing physician in a private practice, I see the caliber of people that are applying for clinical positions in our office. As a result, we can have input to the curriculum that is taught as it pertains to real world experience in a clinical setting. I also think that we provide valuable insight to the students that getting their general degrees and want to further their education to obtain professional degrees as well. Many students aspire for certain jobs they believe are a good fit for them. So, it is invaluable to be able to shadow in our clinic and see it first hand and make sure it is the proper career to pursue.

Having a close relationship with Keiser's faculty and students has been tremendous for our practice. We have been able to hire some of the students post-graduation. These students in turn have made such a wonderful impact on the community here in Port Saint Lucie. In addition, the community-based events they hold on campus bring the surrounding residents together and they also support so many good charities in the area.

If I can be of any further assistance in regard to Keiser or its advisory board do not hesitate to reach out to me.

Yours in health,

A handwritten signature in black ink, appearing to be "B. Jensen", written over a light blue circular stamp.

Dr. Bill Jensen D.C.
