

March 18, 2022

To Whom It May Concern,

My name is Dr Luis F Roa, and I have the privilege of being part of Keiser University's advisory board for the PTA program in its Miami campus for the past 6 years. When Dr. Marangela Obispo approach me with the invitation to participate I was flattered and honored to be part of such an ambitious project. Being a Physical Therapist for the past 16 years, I've had the opportunity to work in different settings and help numerous patients. As part of the Advisory Board, I was able to share my experiences and the current reality of our profession. I have also been able to give my point of view and suggestions to bring this program to an optimal level that would make its graduates the competitive edge and stand out among its peers.

Roa Rehabilitation Services Inc. was established approximately 10 years ago, we treat patients as well as provided consulting and continuing education to small home health agencies that want to refresh and sharpen the skills of its clinicians. I have also had the opportunity to work with Keiser graduates on the field supervise and receive feedback from patient's who they have positively impacted their lives and are extremely grateful to have regained independence and function thanks to them. Now in 2022 we are expanding in the field and will venture into direct patient care both in Dade and Broward County and Keiser's Physical Therapy Assistant program graduates will play a key role in this process. The level of professionalism and knowledge we expect is ideal to have these new therapists become part of the work force.

Keiser University is servicing the community in an important and valuable way by bringing into the work force professionals in different work careers. In the health care field, Keiser stands shoulder to shoulder with other programs and excel in professionalism, organizational skills, towards those who its graduates care for. Qualities like time management and productivity, a quality that I as a business owner seek and encourage to see in a possible candidate that will be part of my work team.

I hope this information can be of assistance to illustrate the importance in the professional world of the Keiser University's graduates. Any further questions feel free to contact me at any time

Best Regards,

Luis F Roa DPT
