To Whom it may Concern:

I have been a member of the Keiser University Advisory Board for Chiropractic Medicine since its inception in 2016. I chose to be an advisor for this program as I was excited that we had a brand new Chiropractic degree program right here in my own community. Having worked in the West Palm Beach area in practice for over 20 years, I am a proponent of expanding the reach of Chiropractic and this seemed like a great way to do that. I was able to meet and work with Dr. Michael Wiles who set up and lead the program from its start and had a good working relationship with him. I have seen that Keiser University has been a great benefit to our community in providing a quality education in several career minded fields. They also have done a great job in providing community outreach and developing a local resident university for local students looking to train for their careers here in their hometown.

Keiser has been a benefit to our local business as well. We have been an internship location for several of their career programs including physical therapy and radiology fields. Due to this relationship, we have been able to hire some of their new graduates who have worked out very well for our organization. We have found that the Keiser graduates on average are better prepared for their careers and work to a higher standard than employees we hire from other venues. When looking for new employees, we definitely look to Keiser students to fill positions.

Sincerely,

A handwritten signature in blue ink, appearing to be "Timothy F. McQueeney". The signature is stylized with a large loop and a long horizontal stroke extending to the right.
